West Midlands Radiotherapy Clinical Protocol

Rectal/Colorectal Protocol

At the West Midlands Radiotherapy Expert Advisory Group (EAG) meeting held on 8th December 2023, all trusts providing radiotherapy in the West Midlands confirmed they were using the national RCR guidelines, and so there was no need for a stand-alone regional protocol.

During February-March 2026, all West Midlands clinical oncologists specialising in colorectal were asked to raise any objections to retaining the approach of linking to the national RCR protocol. No objections were received.

Review Date:	March 2028
